- Appendix E: Administrative Fee Account

Introduction to the Water Pollution Control Revolving Fund

Colorado’s Water Pollution Control Revolving Fund (WPCRF) provides financial assistance to governmental agencies to construct wastewater projects that improve public and environmental health. The program is sustained through reloan funds, administrative fees, EPA annual appropriations (through capitalization grants to the state each year), and interest earnings.

Partner agencies

Colorado statute directs the Colorado Department of Public Health and Environment’s Water Quality Control Division, the Colorado Water Resources and Power Development Authority, and the Colorado Department of Local Affairs (DOLA) to jointly operate the program. These agencies administer the WPCRF with common goals approved and supported by the Water Quality Control Commission and the authority board of directors.

Agency responsibilities

Division	Authority	DOLA
<ul style="list-style-type: none">• Primary agency.• Administers program.• Provides technical review and advising.• Reports to the federal government.	<ul style="list-style-type: none">• Provides financial structure.• Manages budgets and investments.• Disburses funds.• Reports to federal and state governments.• Provides a state match.• Monitors loan portfolio.	<ul style="list-style-type: none">• Conducts financial capacity assessments.• Provides financial and managerial assistance to systems.• Coordinates funding collaboration.• Conducts program outreach.

Water Pollution Control Revolving Fund Mission

- ❖ Provide low cost, affordable financing to Colorado’s wastewater systems to address the state’s priority water-related public health, water quality and infrastructure needs.
- ❖ Actively target and allocate affordable resources to projects and initiatives that result in significant public health and environmental benefits, while building and maintaining a perpetual, self-sustaining revolving loan fund program.
- ❖ Manage the fund in a manner that provides benefits for current and future generations.

The agencies also partner with Colorado Water Conservation Board, USDA Rural Development, Colorado Rural Water Association, the Rural Community Assistance Corporation, and other agencies to collaborate on financing when appropriate.

Intended Use Plan (IUP)

EPA's capitalization grant agreement requires an annual Intended Use Plan (IUP). The IUP provides the framework to use funds, finance water quality infrastructure, and support related program activities during the 2026 calendar year.

2026 Short-Term Goals

- Provide outreach, technical, and financial assistance to communities for projects that:
 - Protect existing water quality.
 - Address pollutant discharges to stream segments that have been designated as impaired for specific pollutants.
- Continually review the effectiveness of the priority scoring model (Attachment I) and the use of additional subsidies.
- Review the disadvantaged community criteria annually to ensure they include Colorado's disproportionately impacted communities as defined by the General Assembly.

Long-Term Goals

Colorado's long-term program goals aim to improve, maintain, and/or restore water quality for priority water bodies. These goals include:

- Strengthening funding coordination efforts.
- Conducting training to build financial and managerial capacity of public wastewater systems across the state.
- Providing affordable financial assistance for eligible applicants while maintaining a perpetual, self-sustaining revolving loan program.

Project Lists

Appendix A: WPCRF 2026 project eligibility list

This appendix contains information on all projects for which an entity/public water system completed an eligibility survey in 2025. The WPCRF releases the survey annually to potential borrowers to capture 20-year capital improvement needs. Appendix A includes the name of the public entity, a description of the project, the population, the estimated cost of the project, the potential for green infrastructure, and the estimated cost.

The list is intended to capture the 20-year capital improvement needs for anticipated eligible water quality projects including wastewater point source, nonpoint source, stormwater, and source water assessment projects. Communities can add, modify, and remove projects on [Appendix A](#) by completing an eligibility survey in June of each year.

Appendix B: WPCRF 2026 base and IIJA project priority / fundable list

Appendix B includes an inventory of projects that:

- Have started the WPCRF application process and may receive a loan in 2026.
- Have recently received a loan from the base WPCRF or Infrastructure, Investment and Jobs Act (IIJA).
- May need emerging contaminant funding, as described in Attachment V.

[Appendix B](#) includes an estimated project cost or approved loan amount, project description, preliminary disadvantaged community status, preliminary source of funding (base or IIJA), associated loan term and interest rate, and green infrastructure categories.

Projects in [Appendix B](#) have been assigned preliminary priority points. Preliminary priority points may reflect partial scoring and are subject to change. Additionally, the priority rank does not necessarily correspond to the order of funding. Bypassing the order on the list is based on readiness to proceed by projects that complete all required steps according to WPCRF procedures to submit an approvable loan application. See the Prioritization section for details. Additionally, emergency procedures may receive priority funding. See the Emergency Procedures section for details.

The division maintains an updated copy of Appendix B on the [grants and loans website](#).

Criteria, Methods and Evaluation for Distribution

Application procedures

The WPCRF accepts loan applications throughout the year. Application deadlines correspond to an upcoming authority board meeting during which the loan will be considered. Before applying, applicants should coordinate with their assigned division project manager to understand pre-application requirements and choose an appropriate deadline.

Direct loans are requests of \$3 million or less, while leveraged loans are requests greater than \$3 million, unless otherwise approved by the authority board.

Prioritization procedures

Attachment I: Water Pollution Control Revolving Fund Priority Scoring Model

The [priority scoring model](#) is used to determine project priority scoring.

- The WPCRF will provide projects a preliminary priority score at pre-qualification review, and a final score at the project needs assessment (PNA) approval.
- The score determined at PNA approval is valid for up to 12 months.
- If an applicant submits a loan application after the 12-month deadline, the applicant or their project manager may request rescoring ahead of the intended loan application date.
- The WPCRF committee may adjust the timing of issuing preliminary and final priority scoring as well as the timeframe for validity of the final scoring if needed.

- The final priority scoring will determine when a project may submit a loan application.

Projects that score at or above the priority point threshold as listed below may apply at any loan cycle during the year (at both “open” and “limited” cycles as shown in the schedule below). Projects that score below the threshold may only apply at the “open” cycles unless they meet one of the following exceptions:

- Applicants that meet requirements as a disadvantaged community under the WPCRF base program automatically score at or above the priority point threshold and may apply at any loan application deadline.
- Applicants that request only IJJA emerging contaminants funding and/or only a Green Project Reserve (GPR) loan may apply at any loan application deadline. If an applicant requests base plus IJJA funds, the project must score at or above the priority point threshold.

The 2026 WPCRF priority point threshold is 100 pts.

2026 application schedule

Application deadline	Deadline type	Loan type	Authority meeting
January 5	Open	Leveraged**	March
February 5	Open	Direct	April
April 5	Limited*	Direct	June
June 5	Limited*	Leveraged**	August
August 5	Limited*	Direct	October
October 5	Limited*	Direct	December
November 5	Limited*	Direct	January

*Limited to projects that score at or above the priority point threshold or meet exceptions as described above.

**Leveraged loans are generally funded twice per year (spring and fall). January 5 is the last application date to submit for spring bond issue funding and June 5 is the last application date to submit for fall bond issue funding.

Scoring for applications in progress

Following commission approval of this IUP in fall 2025, the WPCRF will issue priority point scoring for use in 2026 to all projects in the application process.

- Final priority point scoring will be issued to projects that have received PNA approval; otherwise preliminary scoring will be provided.
- Throughout the year, the authority board may review and adjust the priority point threshold, and number of open and limited cycles to account for changes in funding capacity and program demand.
- If funding requests exceed the available funds at any loan application deadline, further prioritization may be required.
 - Further prioritization will consist of rescoring all projects in a given cycle according to the priority scoring model, based on all current benchmarks.

Preliminary or final scoring provided at pre-qualification or PNA stages will not impact this scoring. In the event two or more applications tie based on priority scoring:

- The agencies will use the highest total affordability score to break the tie.
- If a tie remains, the agencies will use the total score for the Water Quality Improvement Criteria ([Attachment I](#)).
- If further tiebreakers are required, the remaining categories of the priority scoring model will be used systematically until the tie is broken.

Loan applicants that do not receive funding due to their rank may be considered at the next applicable loan application date at the applicant's request.

Loan approvals

- All loan approvals are valid for 18 months from the authority board approval date.
- Prioritized and approved loans that do not execute their loan within 18 months will be reprioritized upon the next application deadline as necessary and require new board approval.
- If an applicant submits for supplemental funding, and the division determines the project is a necessary continuation of the originally proposed project, the entity may receive the same interest rate as the initial loan, or the prevailing interest rate, whichever is lower.
 - This provision is subject to authority board approval, and the authority board may review and establish a time limit from the initial loan to when a supplemental loan application will remain under the same terms as the initial loan.

Allocation of loan proceeds

The commission and the authority board set processes and procedures for the WPCRF. The authority board determines the appropriate use of loan proceeds with input from the WPCRF committee. The fund uses proceeds from loans, EPA capitalization grants, and administration fees to benefit communities through planning grants, design and engineering grants, principal forgiveness, disadvantaged community loans, direct loans, and leveraged loans.

2026 grant requirements

For federal fiscal year 2026, and consistent with the 2025 appropriations language, the following requirements apply to each state receiving WPCRF capitalization grants. However, these may be subject to change based on new requirements.

- Green Project Reserve.
- Additional subsidy.
- Davis-Bacon and related acts.
- American iron and steel requirements.
- Debarment and suspension.
- Disadvantaged Business Enterprise Program.
- Williams-Steiger Occupational Safety and Health Act.

- Archaeological and Historic Preservation Act.
- Environmental review - compliance with the National Environmental Policy Act.
- Architectural and engineering services procurement.
- Generally accepted accounting principles.
- Fiscal sustainability plan.
- Cost and effectiveness evaluation.
- Signage.
- Build America, Buy America.

Green Project Reserve

Historically, the capitalization grant agreement required the WPCRF to direct a portion of the capitalization grant toward projects that address green infrastructure, water efficiency, energy efficiency, or other environmentally innovative activities. To the extent possible, the WPCRF intends to promote green projects within the state. Incentives will meet or exceed the requirements of the 2026 capitalization grant. All Green Project Reserve terms are subject to authority board action and are not guaranteed.

Green Project Reserve incentives

- Eligible green costs greater than or equal to 15%, but less than 20% of the total project cost may receive a reduced loan interest rate up to a maximum of \$3 million.
- Eligible green costs greater than or equal to 20% of the total project cost, may receive a further reduced loan interest rate up to a maximum of \$3 million.
- Projects receiving a loan greater than \$3 million are eligible for the reduced interest rate on the first \$3 million. The authority board may classify the remainder of the loan as leveraged or direct.

For more information, including sample business cases, visit the resources section on the State Revolving Fund [webpage](#).

Additional subsidy

The 2025 WPCRF capitalization grant indicates that in addition to the 10% additional subsidy required in the Clean Water Act Section section 603(i), an additional 10%, but no more than a total of 30%, of capitalization grant funds are to be used by the state to provide additional subsidies to eligible recipients. The same requirement is assumed for 2026. The authority board determines the additional subsidy amount based on the capitalization grant conditions, guidance from EPA, and alignment with program needs. Colorado provides additional subsidies to eligible disadvantaged communities in the form of loan principal forgiveness. Amounts available will vary, and at times, may not be available. Refer to the Disadvantaged Communities Loan [section](#).

Colorado issues a portion of the additional subsidy for the design and engineering phase (see Design and Engineering Grants section). This provides an opportunity to assist disadvantaged communities with design and engineering costs and to better prepare projects to move quickly to construction.

Loan principal forgiveness may be awarded at the loan approval phase for additional project costs, such as construction. The guidelines for issuing loan principal forgiveness at loan approval include:

- The amount of principal forgiveness awarded will be determined during the loan approval phase and will occur throughout the year until all funds have been allocated.
- The authority board approves the total annual amount of additional subsidy within the required EPA percentage range under the capitalization grant.
- The amount of loan principal forgiveness determined at loan approval is based on the required loan amount, excluding any awarded grants or other funding. Final loan principal forgiveness amounts are subject to review and approval by the authority board.
- The amount of loan principal forgiveness will not count toward the direct loan limit.
- Based on the availability of funds and program demands, the authority board may establish a “not-to-exceed” amount per project as low as zero, or award additional amounts based on evaluation of financial need. Not-to-exceed amounts may differ between base program disadvantaged communities and IIJA-eligible projects as determined by the authority board.
- Funds are available to Category 1 and 2 disadvantaged community loans and if deemed necessary and if approved by the authority board, standard direct loans.
- Loan principal forgiveness per project will be limited by the priority scoring model and the application of additional subsidization requirements (Attachments I and II).
- The loan principal forgiveness amount may be reduced if the loan amount is reduced after approval.
- Any remaining funds from 2025 will be distributed in calendar year 2026.

If funds are unallocated from 2026, the agencies will issue funds to disadvantaged communities per the 2027 Water Pollution Control Revolving Fund Intended Use Plan.

Davis-Bacon and related acts

The requirements of Section 602(b)(6) of the Federal Water Pollution Control Act (WPCA) regarding prevailing wage rates shall apply to the construction of treatment works carried out in whole or in part with assistance made available by a state revolving loan fund as authorized under the Federal Water Pollution Control Act, or Section 205(m) of the Water Resources Reform and Redevelopment Act.

American iron and steel

The capitalization grant requires implementation of Title VI of the Clean Water Act as amended by the Water Resources Reform and Redevelopment Act of 2014 by requiring that all iron and steel products used for the construction, alteration, maintenance, or repair of a treatment work are produced in the United States. This requirement applies to projects carried out in whole or in part with assistance made available by a state revolving fund loan.

Debarment and suspension

Recipients of EPA financial assistance agreements must not be presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any federal department or agency. The borrower must also ensure that any consultants, prime contractors, subcontractors, vendors, suppliers, and manufacturers meet the requirements and are not excluded from

covered transactions by any federal agency (as identified through the [System for Award Management](#)). The specific requirements with regards to debarment and suspension, including verification through the System for Award Management, are outlined in the EPA General Terms and Conditions for the capitalization grant.

Disadvantaged Business Enterprise Program

The goal of the Disadvantaged Business Enterprise Program is to ensure there is equal opportunity in the award of federally assisted contracts. Recipients of EPA financial assistance agreements are required to seek and are encouraged to use small, minority-owned, women-owned, or disadvantaged businesses for project procurement. This requirement applies to equivalency-designated projects.

Williams-Steiger Occupational Safety and Health Act

Recipients of EPA financial assistance agreements are required to ensure that all contractors working on project construction are subject to the provisions of the Williams-Steiger Occupational Safety and Health Act of 1970.

Archaeological and Historic Preservation Act

Recipients of EPA financial assistance agreements are required to ensure that archeological discoveries, or discoveries of cultural significance, are protected through appropriate procedures.

Environmental review - compliance with the National Environmental Policy Act

All proposed actions funded by the WPCRF must undergo an environmental review process to assess compliance with the National Environmental Policy Act and state environmental review process. The state, borrower, engineer, contractor, and subcontractor have a duty to cooperate fully with federal and local governments, and all other concerned public and private organizations, to use all practical means and measures, including financial and technical assistance, and to create and maintain conditions under which people and nature can exist in productive harmony and promote the general welfare of the public.

Architectural and engineering services procurement

Recipients of EPA financial assistance agreements are required to use qualification-based selection methods for architectural and engineering (A/E) services on equivalency-designated projects. It is recommended that all projects pursuing state revolving fund loans use a procurement methodology that meets or exceeds the architectural and engineering procurement requirements of 40 U.S.C. 1101 et seq.

Generally accepted accounting principles

Recipients of EPA financial assistance agreements are required to maintain project accounts according to generally accepted accounting principles. This provision requires borrowers to use standards relating to the reporting of infrastructure assets.

Fiscal sustainability plan

Recipients of EPA financial assistance agreements are required to develop and implement a fiscal sustainability plan and certify that the plan was developed and implemented by the conclusion of the project. The plan must address an inventory of critical assets, an evaluation of the condition and performance of inventoried assets, a certification that the recipient has evaluated and will implement water

and energy conservation efforts, a plan for maintaining, repairing, and as necessary, replacing the treatment works; and a plan for funding such activities.

Cost and effectiveness evaluation

Recipients of EPA financial assistance agreements are required to study and evaluate the cost and effectiveness of the processes, materials, techniques, and technologies to carry out the proposed project.

Signage

The EPA capitalization grant requires equivalency designated projects to comply with the program signage guidance to enhance public awareness of EPA assistance agreements in Colorado. This requirement applies to equivalency-designated projects. IIJA-funded projects may also be subject to signage requirements.

Build America, Buy America Act

Title IX of the IIJA created the Build America, Buy America (BABA) Act for federal financial assistance programs for infrastructure, including the WPCRF. BABA requires that all iron, steel, and manufactured products used in a project are produced in the United States and that all construction materials are manufactured in the United States. This requirement applies to projects carried out in whole or in part with assistance made available by a state revolving fund loan and applies to equivalency-designated projects.

Clean Air Act and the Federal Water Pollution Control Act

Recipients of EPA financial assistance agreements are required to ensure that they are in compliance with both the Clean Air Act and the Federal Water Pollution Control Act or the awarded funds remedy the violations and bring the facility back into compliance.

Uniform Relocation Assistance and Real Property Acquisition Policies Act

The EPA capitalization grant requires equivalency designated projects to comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act to ensure fair and equitable treatment of persons who are displaced from their homes, farms, or businesses to make way for federal or federally assisted projects. The Act also requires agencies to reimburse individuals for actual and reasonable expenses incident to relocation, such as moving costs, direct loss of tangible personal property associated with moving or discontinuing a business, and expenses involved in searching for a replacement home or business site.

Capitalization grants and reloan funds

Executed loans are funded with any available sources, grants, or reloan. Loans will not be designated solely grant or reloan funds. Funds will be disbursed based on whichever funds are available and needed at the time of the draws.

Miscellaneous

The EPA capitalization grant may be allocated to any or all projects based on the amount of available funds and/or at the direction of the EPA. Equivalency requires the application of all federal funding requirements to a given number of projects that total to a funding amount equivalent to that of the capitalization grant received. The capitalization grant allows equivalency projects to be designated by the WPCRF.

The application for the capitalization grant includes a proposed payment schedule using federal fiscal year 2025 funds. The payment schedule identifies the anticipated amount of EPA automated clearinghouse withdrawals from the capitalization grant and state dollars to be deposited into the fund.

The Colorado WPCRF will provide the necessary assurance and certifications as part of the capitalization grant agreement and operating agreement between Colorado and EPA.

In accordance with federal statutes, states are authorized to provide loans at or below-market interest rates, including interest-free loans, at terms not to exceed the lesser of the following: 30 years or the project useful life (as determined by the state). The authority board can determine the interest rate and loan terms of the WPCRF at its discretion.

The WPCRF agencies input project data into the EPA SRF Data System to report key project characteristics and milestone information on a quarterly basis.

Infrastructure Investment and Jobs Act (IIJA)

The federal government passed the IIJA on Nov. 15, 2021, providing additional funding to the WPCRF for federal fiscal years 2022-2026. The state reviewed the federal infrastructure funding that was approved for the WPCRF and developed an addendum to the 2022 WPCRF IUP to describe the requirements of the funding and the methods of distribution. The addendum was submitted for public comment and approved by the commission on June 14, 2022. The addendum has been incorporated into this IUP as [Attachment V](#) and updated for funds distribution in 2026.

Disadvantaged Communities Loans

Disadvantaged communities are defined as having a population of 10,000 or less and meeting certain primary factors or a combination of primary and secondary factors. Government agencies determined to be disadvantaged are eligible for a reduced interest rate, design and engineering grants, and/or additional subsidy if available.

Communities are evaluated for disadvantaged community status after submitting the PNA and again at the time of loan application. The primary and secondary factors used for determination are described below. Communities that did not qualify at the PNA submittal may qualify at loan application or other appropriate time as determined by the WPCRF committee. The WPCRF agencies review disadvantaged community criteria, benchmarks, and affordability annually to assess efficacy, as well as adjust benchmark thresholds based on the current statewide demographic data.

Primary and secondary factors

Primary factors	Benchmark
P1 community median household income (MHI)	Reliable MHI less than or equal to 80% of the state MHI.
P2 community median home value (MHV)	Reliable MHV less than 80% of the state MHV.

P3 county 24-month unemployment rate or county 10-year change in jobs	Unemployment Rate greater than state rate plus 1% or loss in total jobs over a 10-year period.
--	---

Secondary factors	Benchmark
-------------------	-----------

S1 county median household income (MHI)	Reliable MHI less than or equal to 80% of the state MHI.
---	---

S2 10-year change in population	The community has lost population over a 10-year period.
---------------------------------	---

S3 assessed value/household	The community's total assessed value is less than the median Colorado municipality.
-----------------------------	--

S4 current & projected system debt per tap to MHV	Current and projected system debt per tap to MHV is greater than that of the median Colorado municipality.
--	--

S5 system full-cost per tap to MHI or required revenue per tap to MHI	Full cost is greater than median municipality or required revenue is greater than the median Colorado municipality.
--	---

For details on factor data sources, reliability,
and definitions, see the [Colorado SRF DAC
Data Glossary](#).

Eligibility scenarios

Scenario	Primary factors	Results	Secondary factors	Results
	(P2) MHV or (P3) Unemployment/ Jobs		Unnecessary	
	Neither (P2) MHV or (P3) Unemployment/ Jobs		Meet at least two of five	
	Both (P2) MHV and (P3) Unemployment/ Jobs		Meet at least two of five	

Disadvantaged communities are classified as either Category 1 or Category 2. If a community meets any one of the three scenarios above, the community is a Category 1. If, at the time of loan application review, a community’s “current and projected system debt to MHV” and “required revenue per tap to MHI” is greater than 80% of municipalities, the applicant will be recommended to be Category 2. The table below illustrates the loan terms and interest rates for each respective category.

Categories

DAC	Qualify	Loan Amount	Loan Rates*
Category 1	Meet one of the 3 scenarios.	Up to \$3 million loan principal per project	Current interest rate is 2.50% for a 20-year term and 2.75% for a 30-year term.*
Category 2	Meet one of the 3 scenarios and both Projected System Debt to MHV and Required Revenue per Tap to MHI to exceed the municipal 80th percentile for each factor.	Up to \$3 million loan principal per project	Current interest rate is 1.50% for a 20-year term and 1.75% for a 30-year term.*

*The authority board typically determines interest rates on or before December 31 each year for the upcoming calendar year; however, rates are subject to change throughout the year.

Business case

In the event that a community’s primary or secondary factor data does not represent recent, significant economic distress, or a scenario is marginally disqualifying, a business case may be presented to the authority board for an eligibility determination. The business case should be coordinated with the project team and be based on the factors the community has determined as not reflective of the community’s

current socioeconomic or projected fiscal condition. A business case may be conducted after submission of an acceptable PNA.

Eligibility period

An eligibility determination is valid for a period of 12 months from the date of the PNA review letter, or another date as determined by the WPCRF committee. Status will be redetermined if the applicant does not submit a complete loan application within 12 months.

All projects are evaluated by the WPCRF team at the time of the loan application to determine if they meet the criteria for a Category 1 or Category 2 disadvantaged community status. Applicants that were qualified as a disadvantaged community at the PNA will retain (or can improve) their status at the time of loan application as long as the application has been submitted within 12 months as described in the eligibility determination section.

If a disadvantaged community submits for supplemental funding and the division determines the project a necessary continuation of the originally proposed project, the entity will continue to qualify as a disadvantaged community at the same category as the initial loan and will receive the original loan term, and either the same disadvantaged community interest rate as the initial loan, or the prevailing disadvantaged community interest rate, whichever is lower. This provision is subject to the authority board approval and the authority board may review and establish a time limit from the initial loan to when a supplemental loan application will remain under the same disadvantaged community determination and loan terms as the initial loan.

Planning and conversion planning grants

The intent of the planning grant is to assist applicants with the costs of complying with WPCRF requirements such as the PNA, environmental assessments, energy audits, and activities including legal and accounting fees that may be associated with the formation of a governmental entity. Planning grants are only intended to assist disadvantaged communities that expect to come through the program. One planning grant of up to \$10,000 may be awarded per disadvantaged community, per project. The authority may review and adjust the maximum planning grant amount if necessary.

A conversion planning grant may be provided to assist with the costs converting a privately owned for-profit or non-profit system into a governmental entity, such as a special, local, or public improvement district, for the purposes of financing an eligible project through the WPCRF, as well as the costs of complying with program requirements described above. An entity cannot receive both a planning grant and a conversion planning grant, and one conversion planning grant of up to \$25,000 may be awarded per disadvantaged community.

Entities that meet the disadvantaged community criteria and have the project on the current year's IUP (on [Appendix A - Project Eligibility List](#)) are eligible. Entities that meet the disadvantaged community criteria but are not on Appendix A - Project Eligibility List will be required to list the project in the subsequent year's project eligibility list to be considered. Planning grant requests are included as part of the pre-qualification process and are required to have a pre-qualification meeting with WPCRF staff. Business cases as defined in the IUP will not be used for determining planning grant eligibility.

Planning grant invoices are paid at an 80:20 ratio to meet a 20% match requirement. Planning grant terms are a maximum of one year unless otherwise approved by the authority board or its executive director.

Design and engineering grants

Additional subsidies for federal fiscal year 2026 will be used to fund design and engineering activities for disadvantaged communities. A project, as approved in the PNA, may be eligible for up to a \$300,000 design & engineering grant. The authority board may review and adjust the maximum design & engineering grant amount if necessary. The amount of the grant is determined by actual design and engineering fees relative to total project costs.

Entities that meet the disadvantaged community criteria with the project on the current year WPCRF IUP (on [Appendix A - Project Eligibility List](#)), are eligible for design and engineering grants. The applicant must submit a PNA and an environmental determination checklist to initiate grant eligibility. If the demand for design and engineering grants is greater than the capacity of funds set aside for the grants, the WPCRF may prioritize the issuance of design and engineering grants based upon applicant population. Applicants with a population of 5,000 or less will be prioritized ahead of applicants with a population greater than 5,000 until all funds have been allocated.

Design and engineering grant invoices are paid at an 80:20 ratio to meet a 20% match requirement. The 20% match portion shall be reimbursed upon execution of the WPCRF loan. Design and engineering grants are only intended to assist entities that expect to come through the program for loan funding. Design and engineering grants have an 18-month expiration unless otherwise approved by the authority board or authority executive director.

Special Projects

The division supports:

- The Clean Water Measurable Results Program.
- Source water protection.
- Streambank restoration, forest thinning, and forest health projects related to surface water intake structures and source water protection to promote more resilient systems.
- Disaster support.
- Support the use of administrative fees for 401 certifications.
- Online project management and tracking system for program-funded projects.
- DOLA staff outreach to small communities that have never or not recently received funding through the WPCRF. The purpose of the outreach is to ensure the communities are aware of the program and its associated benefits, such as technical assistance for project development. This may include, but is not limited to, funding coordination, financial analysis, project affordability, and assistance in developing requests for proposals for contract engineering.

Emergency Procedures

The commission may amend [Appendix A: WPCRF 2026 Project Eligibility List](#), [Appendix B: WPCRF 2026 Base and IIJA Project Priority/Fundable List](#) at any time throughout the year to include projects determined and declared to be emergency projects needed to prevent or address threats to public health. In cases where the commission determines amendments will result in substantial changes to Appendix A or B, the commission will provide public notice and an opportunity for comment on the proposed inclusions.

Financial Status

As of June 30, 2025 the agencies have awarded:

- 117 WPCRF direct loans totaling \$167,111,395.
- 6 WPCRF/IIJA direct loans totaling \$45,330,121.
- 120 WPCRF leveraged loans totaling \$1,261,214,361.
- 157 disadvantaged community loans totaling \$117,560,604 were administered or are currently being administered by the state (not including ARRA loans but including IIJA loans).
- In addition, as of Dec. 31, 2011, the state administered 12 American Recovery and Reinvestment Act (ARRA) loans, including principal forgiveness totaling \$30,093,792.
- The total loan amount for all 412 loans is \$1,621,310,273.

Funding levels

The federal fiscal year 2025 capitalization grant award is expected in late 2025. The estimated EPA award is \$12,691,000, and the state match is \$2,538,200, for a total of \$15,229,200. State match is 20% of the total amount of the capitalization grant. The authority provides the state match to receive the base program federal capitalization grant. The state is unable to determine the specific amount and funding levels for the 2026 capitalization grant. For appendices and table purposes, the 2025 amounts were assumed for 2026.

The total amount of federal capitalization grant awards through federal fiscal year 2025 available for loans and program administration is \$471,835,923. Of this amount, \$453,904,683 has been obligated through June 30, 2025, for loans (see [Appendix C](#) and [Appendix D](#)), which includes \$17,931,240 allocated for program administration and technical assistance. The amount of unobligated grant funds as of June 30, 2025, is \$0.

Direct and leveraged loans

The WPCRF issues low-interest, low cost direct loans. Direct loans are designed for smaller projects, at or under \$3 million, unless otherwise approved by the authority board. Direct loans in excess of \$3 million may be offered based on approval by the authority board. The direct loan sources are capitalization grant funds and/or reloan funds.

Approximately \$112 million of grant and reloan funds are available for loans for the remainder of 2025 and into 2026. Because the state leverages the fund, the 2026 loan capacity of the fund is estimated to be approximately \$145 million as seen in [Attachment III: Estimated Loan Capacity for 2026](#). To leverage the

available grant and reloan funds for 2025 and 2026, the authority anticipates issuing \$10 to \$50 million in state revolving fund/clean water revenue bonds. The authority board determines the interest rate for direct loans and the interest rate subsidy for leveraged loans. The authority board may also adjust the leveraged loan subsidy and could establish a minimum interest rate floor for leveraged loans based on market conditions to maintain adequate administrative fees.

Administrative fees

The WPCRF currently retains a portion of loan interest as an “administrative fee” on all loans based on the original principal amount of the loan. The authority board establishes the percentage of administrative fee (currently 1.0% and subject to change). It is estimated that \$8.1 million will be generated in loan administrative fees in 2025 and \$8.3 million in 2026. Up to \$1 million of fund administrative fees collected from loans may be transferred to the Drinking Water Revolving Fund to pay for the administrative costs of that fund. Additionally, the WPCRF draws 4% of the capitalization grant for program administration and does not exceed the statutory limit.

[Appendix E: Administrative Fee Account](#) identifies revenues and expenses from the administrative fee account that are outside of the revolving loan fund. The values in this table may not reconcile the differences between cash and accrual accounting methods. In consultation with the commission and the authority board, the division intends to pursue the option of using funds generated from the loan fee to fund eligible water quality activities as provided in EPA’s CWSRF 06-01 Policy Memo regarding Guidance on Fees Charged by States to Recipients of Clean Water State Revolving Program Assistance. These activities may include water quality monitoring, developing total maximum daily loads, water quality restoration plans, and management of other state financial assistance programs for water quality-related purposes. Additionally, administrative fee income will be used to fund planning grants.

The proposed payment schedule using federal fiscal year 2026 WPCRF monies will be included in the application for the capitalization grant. The payment schedule identifies the anticipated amount of EPA draws from the capitalization grant and state dollars to be deposited into the fund.

Proportionality

The State of Colorado meets the proportionality regulations as required by the EPA.

Transfer Activities

As authorized by Congress, Section 302 of the Safe Drinking Water Act amendments authorizes a state to transfer up to 33% of the capitalization grant (in a fiscal year) from one revolving fund to the other, i.e. the Drinking Water Revolving Fund (DWRF) to the WPCRF and vice versa. In turn, 33% of the cumulative capitalization grants for federal fiscal years 1997-2025 (total DWRF grants at \$470,898,400) may be reserved from the DWRF and transferred to the WPCRF and vice versa. For more details, refer to Attachment IV: Net Funds Available for Transfer, which itemizes the amount of net monies available for transfer between the two funds.

Based on the commission and governor approvals, a transfer of no more than \$10 million may be made in 2026. If a transfer is pursued, a stakeholder group will be notified of the state’s intent to transfer funds. The exact amount of the transfer will be determined based on the demands of the two revolving funds. None of

the transferred funds will be used for administrative purposes. Any transfer would be deposited into the appropriate fund and only available for loans. With the statutory language approved by the Colorado State General Assembly in 2002, any transfer can be made from one account to the other with appropriate approvals.

It is estimated that a transfer of \$5 - \$10 million from either fund will reduce the level of that fund by an additional \$1 - \$2.5 million/year over the next 20 years.

Cross-Collateralization Activities

Beginning in the calendar year 1999, the two revolving funds cross-collateralized or pledged monies on deposits in one fund to act as additional security for bonds secured by monies on deposits in the other fund. The agencies used this mechanism for both funds in 1999, and as a result, the bond ratings for both programs were upgraded to AAA by all three bond rating agencies. This upgrade translates to lower interest rates and therefore more savings to the borrowers of both programs. These savings continue today.

Technical Set-Asides

The 2026 EPA capitalization grant is anticipated to provide for states to use 2% of the funds annually for technical assistance. The federal fiscal year 2025 capitalization grant amount is \$12,691,000 and is assumed to be the same for 2026. The division does not plan to set aside the eligible 2% of the 2026 capitalization grant based on the cut to WPCRF base funding, but reserves the right to take the set-aside if needed. The IJJA supplemental funding will be used to subsidize the activities to provide technical assistance to rural communities to identify projects including, but not limited to, coaching assistance regarding technical, managerial, and financial assistance through the WPCRF. This funding may also be used to contract with technical assistance contractors to provide in-person and virtual training events focused on wastewater operators of publicly owned wastewater treatment works in counties that are rural and underserved and receive few training opportunities.

Public Review and Comment

On September 12, 2025, the commission published this intended use plan. The commission approved the plan, the 2026 WPCRF project eligibility list ([Appendix A](#)), and the project priority/fundable lists ([Appendix B](#)) at an administrative action hearing on October 14, 2025. The intended use plan was made available for public comment one month prior to the administrative action hearing. The commission posted the plan on its website and accepted comments via email. The commission did not receive any written comments during the public comment period on the 2026 WPCRF IUP.

During the annual project eligibility list survey process, the division contacted government agencies to identify potential projects for the 2026 Water Pollution Control Revolving Fund Intended Use Plan. Each year, the division will update the plan to include additional WPCRF projects and other appropriate changes. The division will continually seek public review and comment for the proposed list of eligible projects and the IUP will be brought to the commission for annual approval.

Attachment I: Water Pollution Control Revolving Fund Priority Scoring Model

Water Quality Improvement Criteria	Points
The project addresses a water quality impairment identified in the 303(d) list or a groundwater standard that has been exceeded.	40
Project will implement an approved TMDL (total maximum daily load):	(points not additive, and scored only in one category)
<ul style="list-style-type: none"> ● 1 TMDL. ● 2 TMDLs. ● 3 or more TMDLs. 	50 75 80
Project applies BMPs to mitigate against erosion, sedimentation, pollution runoff including:	
<ul style="list-style-type: none"> ● Creation of riparian buffers, floodplains, vegetated buffers, slope stabilization, and additional stream restoration methods. ● Supports wetland protection, restoration or creation by means of constructed wetlands. 	10 10
Project corrects individual sewage disposal systems or exfiltration for sewers shown to be polluting either surface or groundwater and mitigates a public health emergency and/or a confirmed repeated contamination of a supply source by E. coli, fecal coliform or nitrate above established standards.	50
Financial/Affordability Criteria*	Points
Median Household Income (MHI) of service area:	
<ul style="list-style-type: none"> ● <50% of state MHI ● From 50% to 80% of state MHI ● From 81% to 100% of state MHI ● >100% of state MHI 	35 20 5 0
User Fees (current sewer rate per tap compared to MHI):	
<ul style="list-style-type: none"> ● Rates are > 1.17% ● Rates from 0.84% to 1.17% ● Rates are <0.84% 	45 25
OR	0

User Fees for a combined water & sewer fund (combined rates per tap compared to MHI)

- Rates are > 2.98%
 - Rates from 2.12% to 2.98% 45
 - Rates are <2.12% 25
 - 0
-

Financial/Affordability Criteria Continued Points

Sewer debt per tap compared to MHV:

- Debt is > 0.75% 45
- Debt from 0.16% to 0.75% 25
- Rates are <0.16% 0

OR

Water & sewer debt (for combined systems) per tap compared to MHV:

- Debt is > 1.49% 45
 - Debt from 0.64% to 1.49% 25
 - Debt is <0.64% 0
-

Population served criteria:

- <500
- From 500 to 999
- From 1,000 to 1,999 35
- From 2,000 to 4,999 25
- From 5,000 to 10,000 20
- >10,000 15

Assessed Value/Household 5

- Assessed Value per household is < \$12,271 0
- Assessed Value per household from \$12,271 to \$24,308
- Assessed Value per household from \$24,308 to \$46,143 35
- Assessed Value per household > \$46,143 20

*Financial/Affordability Criteria is based on the most current available DAC benchmarks. 10

0

Permit Compliance	Points (points are not additive, scored only in one category)
Project is designed to maintain permit compliance or meet new permit effluent limits	40
Project addresses a facility's voluntary efforts to resolve a possible violation and will mitigate the issuance of a consent order or other enforcement action.	25
Project addresses an enforcement action by a regulatory agency and the facility is currently in significant non-compliance.	15
Sustainability/Resiliency/Green Project Reserve (GPR)	Points
Project incorporates one or several of the following planning methodologies:	
<ul style="list-style-type: none"> ● Regionalization and consolidation. ● Promoting sustainable utilities and/or communities through: <ul style="list-style-type: none"> ○ Fix it first. ○ Asset management planning. ○ Full cost pricing. ○ Life cycle cost analysis. ○ Evaluation of innovative alternatives to traditional solutions. ● Conservation easements and/or land-use restrictions. 	5 (for one or more)
Sustainability / Resiliency/ Green Project Reserve Continued	Points (points are only scored based on an approved GPR proposal)
Project incorporates Green Project Reserve Components at a minimum of 20% of total project costs:	
<ul style="list-style-type: none"> ● Green infrastructure. ● Water efficiency. ● Environmentally innovative. ● Energy efficiency. ● Project is categorically eligible for the GPR and does NOT require a business case (bonus points). 	10 10 5 5 5

Readiness to Proceed	Points
Project has secured the following: <ul style="list-style-type: none"> ● Plans and specifications approved. 	5
Project implements one or more of the following planning instruments: <ul style="list-style-type: none"> ● Watershed management plan. ● Source water protection plan. ● Nonpoint source management plan. ● Approved 305(b) Report Category 4b designation. ● Nutrient management plan. ● Comprehensive land use planning. 	5 (for one or more)
Project has funding secured by multiple financial assistance provider(s)	10

Attachment II: Application of Additional Subsidization

Additional Subsidization	
Additional Subsidy Points (Affordability Score + Water Quality Improvement Score)	Maximum Percent of Loan Principal as Principal Forgiveness*
≥ 175 points	80% principal forgiveness
150 - 175 points	60% principal forgiveness
100 - 149 points	40% principal forgiveness
<100 points	20% principal forgiveness

*No one project can receive more than 50% of the total amount of funds that have been allocated for additional subsidization for that fiscal year. For example, if Colorado has allocated \$2 million for FY2024 to be provided as additional subsidization, no project can receive more than \$1 million in principal forgiveness. This additional subsidy is in addition to design/engineering grants. The authority board may review and adjust the maximum percent of loan principal forgiveness if needed to meet program financial requirements. This attachment applies to WPCRF base program funding; application of additional subsidization of IIJA funding is addressed in Attachment V. This does not apply to IIJA funding.

Attachment III: Estimated Loan Capacity for 2026

Estimated Loan Capacity for 2026	
Capitalization grants for loans through 2025	\$453,904,683
Obligated for loans through 6/30/25	\$436,178,586
Remainder	\$17,726,096
Estimated 2025 Capitalization Grant*	\$7,000,000
Estimated 2026 Capitalization Grant	\$7,000,000
Estimated 2025 IIJA Supplemental Capitalization Grant*	\$14,000,000
Estimated 2026 IIJA Capitalization Grant	\$14,000,000
Plus transfer from DWRF in 2026	-
Total grant funds available for loans	\$59,726,097
Reloan funds as of 06/30/25	\$60,070,870
plus: De-allocation on 9/1/25	\$41,946,541
plus: De-allocation on 9/1/26	\$28,007,774
Total reloan funds available	\$130,025,185
Total grant plus reloan funds	\$189,751,282
less: Open pool loans remaining balance	\$71,662,628
less: Open pool loans approved but not executed	\$6,000,000
Total funds available	\$112,088,654
Leveraged loans X 1.30	\$145,715,250
2026 WPCRF (base program) Loan Capacity Estimate	\$145,715,250

*The 2025 WPCRF Capitalization Grant award is expected in late 2025. These numbers are based on expected award amounts. Appendix D - Sources and Uses of Funds Statement includes both base and IIJA funding.

Attachment IV: Net Funds Available for Transfer

Year	Transaction	Banked Transfer Ceiling	Transferred from WPCRF to DWRF	Transferred from DWRF to WPCRF	WPCRF Funds Available for Transfer	DWRF Funds Available for Transfer

*Transfers could not occur until one year after the Drinking Water Revolving Fund was established.

**\$6.7 million capitalization grant funds and \$1.3 million state match funds.

***The 2025 WPCRF Capitalization Grant award is expected in late 2025, and these numbers are included to reflect the expected grant amount.

Attachment V: Addendum to the 2026 WPCRF Intended Use Plan Infrastructure Investment and Jobs Act

The Infrastructure Investment and Jobs Act (IIJA) was signed into law on Nov.15, 2021. The IIJA invests more than \$50 billion over the next five years in EPA water infrastructure programs including the WPCRF. Colorado's 2024 IIJA allotment for the WPCRF program totals approximately \$19 million and the 2025 allotment is assumed to be the same for the purposes of this IUP.

This attachment describes the WPCRF program requirements to distribute WPCRF IIJA funding in 2025. The existing (base)2025 WPCRF remains in place, and any changes to the base program or requirements are outlined in this attachment.

The IIJA funding will be issued through the WPCRF in two categories: 1) WPCRF IIJA General Supplemental Funding and 2) WPCRF IIJA Emerging Contaminants Funding. The IUP amendments and the IIJA funding categories are described below.

IIJA Funding Categories and Use of Funds

WPCRF IIJA general supplemental funding

The IIJA includes a general supplemental funding allotment for FFY 2025 to Colorado of \$19,705,000 million for the WPCRF. The existing WPCRF as described in this IUP applies to this funding category and includes the following:

Eligibility

- Eligible entities and projects for this funding must be eligible under the existing WPCRF.
- All WPCRF eligible projects must be listed on the existing Appendix A Water Pollution Control Revolving Fund 2026 Project Eligibility List.

Requirements

- Application, prioritization and approval for funding will be the same as the existing WPCRF.
- State match is 20% of the total amount of the capitalization grant in fiscal year 2026 equaling \$2,538,200. The authority has historically provided the state match to receive the federal capitalization grant. However, the state legislature may also provide the matching funds to meet the requirement.
- The authority board of directors may establish a maximum award amount, which may include a maximum number of times an entity can access funding from this category, based on program demand, and loan interest rate and terms will be determined by the board based on market conditions. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.
- 49% of the capitalization grant amount may be issued as additional subsidization in the form of principal forgiveness and/or grants. The authority board of directors may direct additional subsidization from the WPCRF IIJA supplemental funding to Design and Engineering grants as

described in the base program (see Design and Engineering Grants) as needed in order to subsidize the cuts to the base WPCRF. Additional subsidization may be provided to eligible entities that meet the WPCRF IIJA Principal Forgiveness Eligibility Criteria, as confirmed by the authority board.

- The authority board of directors may establish a maximum award amount, which may include a maximum number of times an entity can access funding from this category, based on program demand, and loan interest rate and terms will be determined by the board based on market conditions. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.

Distribution of funding

- Applicants with eligible projects meeting the WPCRF IIJA principal forgiveness eligibility criteria may qualify to receive IIJA funds at a flat loan/principal forgiveness combination. Applicants with project costs exceeding a maximum award amount, if one is established by the authority board, or exceeding available funds, may receive funds for the remaining project costs through the WPCRF base (existing) program. Additionally, applicants meeting the base program DAC criteria may be eligible for additional principal forgiveness from the base program if funds are available and approved by the authority board.

Administration and technical assistance funds (4%)

The estimated 2026 IIJA WPCRF appropriation for infrastructure is \$19,705,000 million. The division intends to draw the eligible 4% funds (\$788,200). Funds are used to cover administrative and technical assistance expenses related to projects and activities authorized under the Clean Water Act, including the provision of technical assistance to public water systems as identified in an EPA-approved work plan (if one is submitted). This set-aside will support administration of the funding including but not limited to project management and review of all project submittals throughout the life cycle of a project. This includes improvement and development of comprehensive program project management software as needed by the program to maintain effective oversight of all WPCRF requirements related to the loan and project. Use of these funds for comprehensive program project management software is eligible as the software supports all program projects inclusive projects funded by the base WPCRF and IIJA supplemental funding.

Technical assistance set-asides (2%)

The estimated 2026 IIJA WPCRF appropriation for infrastructure is \$19,705,000 million. The division intends to set aside a portion of the eligible 2% (\$225,000) to provide technical assistance to rural communities for project identification and funding including but not limited to coaching assistance regarding technical, managerial, and financial assistance through the WPCRF. This funding may also be used to contract with technical assistance contractors to provide in-person and virtual training events focused on wastewater operators of publicly owned wastewater treatment works in counties that are rural and underserved and receive few training opportunities.

WPCRF IIJA emerging contaminants funding

The IIJA includes funding allocation in 2026 to Colorado of \$1,701,000 (estimated based on the 2025 WPCRF IIJA emerging contaminants award) to be applied to clean water emerging contaminants.

Eligibility

- Eligible entities and projects for this funding must be eligible under the existing WPCRF, and the primary purpose must be to address emerging contaminants.
- All WPCRF-eligible projects must be listed on the existing Appendix A Water Pollution Control Revolving Fund 2026 Project Eligibility List.
- Eligible emerging contaminants for this category include PFAS, some biological and microorganism contaminants, pharmaceuticals and personal care products, nanomaterials, and microplastics. The specific eligibility requirements and eligible emerging contaminants for this category of funding are defined in the EPA IIJA SRF Implementation Memo dated March 8, 2022.

Requirements

- Application, prioritization, and approval for funding will be the same as the existing WPCRF.
- State match is not required.
- 100% of the capitalization grant amount as additional subsidization in the form of principal forgiveness and/or grants. Additional subsidization may be provided to any eligible entity under the existing WPCRF for eligible projects that address emerging contaminants.
- The authority board of directors may establish a maximum award amount based on program demand, which may include a maximum number of times an entity can access funding from this category. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.

Distribution of funding

- All eligible applicants and projects may qualify. Applicants with project costs exceeding a maximum award amount, if one is established by the authority board, exceeding available funds, or with project components unrelated to the mitigation of emerging contaminants, may receive funds for the remaining project costs through the WPCRF supplemental or base programs. Additional principal forgiveness may be available from the WPCRF supplemental or base programs for applicants meeting, as confirmed by the authority board, base program DAC criteria.

Technical set-aside funding - Not setting aside funding

WPCRF IIJA Principal Forgiveness Eligibility Criteria

An eligible applicant may receive IIJA funds with principal forgiveness in the WPCRF IIJA Supplemental General Supplemental Funding if:

1. Applicant qualifies as a base (existing) program disadvantaged community

OR

2. Applicant scores a sum of three (3) points using the below criteria:

1. Population loss or growth slower than the state's over 5 years (benchmark is 0.61%). (1 point)
2. Total possible score of 1 point
 - a. County-level job loss over 10-years. (0.5 points)
 - b. Counties with \geq a 24-month average unemployment rate that exceeds the state's plus 1% (benchmark is 4.47%). (0.5 points)
3. Community Median Household Income is less than the State Median Household Income (benchmark is \$92,470): (1 point). Community Median Household Income that exceeds 125% of the State Median Household Income (benchmark is \$115,588) will lose one point (-1 point).
4. Rates compared to Median Household Income exceed the ratio of estimated annual median rates to state Median Household Income. Benchmarks are 1.35% for combined sewer and drinking water, 0.79% for water, and 0.56% for sewer. (1 point)
5. Project addresses removal of lead or emerging contaminants as these water quality contaminants contribute to environmental risk factors and health disparities. (1 point)
6. Percentage of the population within a community that identifies as minority is greater than 40%. (1 point)
7. Percentage of population within a community that is housing-burdened is greater than 50%. (1 point)
8. Percentage of the population within a community living under 200% of the poverty level is greater than 40%. (1 point)
9. Combined percent of population living under 200% of poverty level + percent of population over 65 years is greater than or equal to two-thirds of communities in the state (benchmark is 55.00%). (1 point)

Notes

- IIJA eligibility is subject to confirmation by the authority board.
- Eligible applicants must be an eligible entity under the existing WPCRF program.
- A community may be evaluated using place, block group, tract, or county-level data, or a combination. The criteria benchmarks listed above will be updated annually and the benchmarks shown may not reflect the most current benchmarks.
- Principal Forgiveness not to exceed amounts may be as low as zero and may differ between base program disadvantaged community and IIJA-eligible projects as determined by the authority board.

IIJA principal forgiveness eligibility determinations and timing

Eligibility for IIJA Principal Forgiveness (PF) will be determined when a project needs assessment is submitted, but is subject to confirmation by the authority board at loan approval. At times, the authority board may request further evaluation of eligibility when scoring does not appear to adequately reflect the

intent of the criteria. Eligibility will be noted in the project needs assessment review letter. Loan applications received within 12 months of the date of the project needs assessment review letter will be eligible for IIJA PF, subject to not to exceed amounts as set by the authority board. Loan applications received after that period or that did not qualify during the initial determination will be evaluated again for PF eligibility.

For applicants that do not meet the IIJA PF eligibility criteria, a business case can be drafted and presented to the authority board after Pre-qualification or Project Needs Assessment submission. SRF project staff will work with the prospective applicant to determine the appropriate timing. If approved by the authority board, the loan application must be received within 12 months from the date of approval.

Fundable list and use of funds

The EPA requires the IUP to identify projects that are anticipated to be funded for which the total cost of assistance requested is at least equal to the amount of the grant being applied for. Projects that expect to be funded include those eligible under section 603(c) of the Clean Water Act, including but not limited to publicly owned treatment works, biosolids, reuse, sewer collection, stormwater, nonpoint source, and green projects. The [WPCRF 2026 Appendix B - Base and IIJA Project Priority/Fundable List](#) is a subset of projects that exist on the [WPCRF 2026 Appendix A - Project Eligibility List](#) but may be funded in 2026 because they have started the WPCRF application process, or have applied for or recently received a loan. Additionally, since the IIJF provides funding specifically for emerging contaminants, Appendix B indicates projects that may receive funding in 2026 from the IIJA emerging contaminant funding. In the case of these projects, the fundable list includes projects that responded to the 2026 WPCRF eligibility survey indicating they have the need for capital project funding within the next 12-18 months to treat emerging contaminants, and provided a project cost. The fundable list includes a preliminary disadvantaged community status and preliminary ranking score; however, these are strictly preliminary and subject to change based on additional information from applicants. It is important to note that any project on the WPCRF 2025 Appendix A - Project Eligibility List is eligible to apply for funding in 2026. The fundable lists are intended to indicate what projects are more likely to be funded in the current year, and indicate to EPA that there is sufficient project demand to spend the EPA capitalization grants. Please note that the application, prioritization, and approval for funding through the IIJA is the same as the base WPCRF and is described in Pgs. 4-6 of this IUP. Appendix B fundable lists are included in the appendices.

In addition, the EPA requires the IUP to include a table identifying all funding sources and uses of funds that are available to the program. As the IIJA provides additional funding to the program in 2025, Appendix D - Sources and Uses of Funds Statement includes the IIJA funding and can be found in the appendices to this IUP.

IIJA funding applicable provisions and additional requirements

All provisions promulgated through statute, guidance, or regulations issued by EPA for the implementation of the CWSRF and DWRP will remain in effect (e.g. American iron and steel and Davis-Bacon-related prevailing wage requirements) unless they are inconsistent with the IIJA, capitalization grant conditions, or the requirements contained in the [EPA IIJA SRF Implementation Memo](#) dated March 8, 2022. The IIJA supplemental appropriations are federal funds and therefore all equivalency requirements apply to projects funded by IIJA.

The EPA IIJA SRF Implementation Memo includes the following other provisions:

1. Equivalency: IIJA supplemental appropriations are federal funds and therefore all equivalency requirements apply to the IIJA capitalization grants.
2. 2. Build America, Buy America Act: IIJA creates the Build America, Buy America (BABA) Act domestic sourcing requirements for federal financial assistance programs for infrastructure, including state revolving fund programs. For more specific information on BABA implementation, please refer to the Office of Management and Budget's Build America, Buy America Act Implementation Guidance. EPA will issue a separate memorandum for BABA after the United States Office of Management and Budget (OMB) publishes its guidance. The American iron and steel provisions of both the CWSRF and DWSRF continue to apply.
3. Reporting: States must use EPA's SRF Data System to report key IIJA project characteristics and milestone information at least quarterly. Additional reporting will be required through the terms and conditions of the grant award. The Federal Funding Accountability and Transparency Act (FFATA) of 2010 requires state revolving fund programs to report on recipients that received federal dollars in the FFATA [Subaward Reporting System](#).
4. Blending Funds and Cash Draws: States have the flexibility to craft single assistance agreements (e.g., loans) that contain multiple types of construction components and activities. These assistance agreements may commit funds from multiple IIJA capitalization grants and base program funds. Upon disbursement of funds, these assistance agreements may draw from both IIJA and base capitalization grants for eligible project components.
5. Green Project Reserve: If provided for in the annual appropriation, the GPR is applicable to the IIJA capitalization grants for the corresponding fiscal year.
6. Inter-fund transfers: Per state revolving fund statute and regulation, states have the flexibility to transfer funds between the CWSRF and DWSRF. Given IIJA's requirements, authorities, and narrower fund eligibilities, states may only transfer funds between the specific IIJA appropriations in the equivalent CWSRF or DWSRF program. In other words, transfer of funds may occur between the CWSRF and DWSRF general IIJA capitalization grants and between the CWSRF and DWSRF IIJA emerging contaminants capitalization grants. Because there is no similar CWSRF appropriation to the DWSRF IIJA LSLR appropriation, no funds may be transferred from or to the DWSRF IIJA LSLR appropriation. States may not transfer IIJA appropriations to or from base appropriations.
 - As authorized by Section 302 of the Safe Drinking Water Act, the state may transfer up to 33% of the capitalization grant between the two revolving funds (DWSRF and WPCRF). The state revolving funds reserve the right to transfer up to the statutory limit of 33% of the IIJA capitalization grants if needed to address the demands on the programs. Based on the lack of demand for WPCRF emerging contaminants funding, and in order to support higher demand for drinking water emerging contaminant funding, the state revolving fund program expects to have completed a transfer of an estimated total of \$7,551,000 (sum of 2022-2026 WPCRF IIJA emerging contaminants grants) through calendar year 2026. As of the drafting of this IUP, the necessary authority and all required approvals were obtained for the transfer, and the program is applying to the EPA to transfer the funds. The transfer is from the WPCRF emerging

contaminant fund to the DWRF emerging contaminant fund. The transfer helps to balance the program demand so the DWRF can provide more emerging contaminant funding in 2025 and should not impact the overall ability of the program to fund projects in the near or long term or have an impact on drinking water set-asides. No changes to payment schedules or binding commitments are anticipated.

A state revolving fund stakeholder group was notified of the state's intent to transfer funds and a stakeholder meeting was held on June 27, 2024, to discuss the transfer and answer stakeholder comments and questions. Transfers are deposited into the appropriate fund. Based on the statutory language approved by the Colorado State General Assembly in 2002 (ref. CRS 37-95-107.8 and 34-95-107.6), any transfer can be made from one account to the other with appropriate approvals. The state revolving fund program ensures all transferred funds meet the federal compliance requirements including federal crosscutter compliance.

7. Recycled funds: To the extent assistance recipients repay IIJA funds or provide interest payments to the state revolving fund program, those repaid funds and interest have the flexibility to be used for any state revolving fund eligible purpose. For example, repaid DWSRF IIJA LSLR funds are not limited to future LSLR projects and activities.
8. Potential state match flexibility: To support implementation of the state revolving fund program, the Department of the Treasury has determined that state and local financial recovery funds under the American Rescue Plan Act (ARPA) available for the provision of government services, up to the amount of the recipient's reduction in revenue due to the public health emergency, may be used to meet the non-federal match requirements of the DWSRF and CWSRF programs.
9. Federal civil rights responsibilities, including Title VI of the Civil Rights Act of 1964 is reviewed by the state to ensure requirements are met and applies to DWRF and WPCRF programs for both base and IIJA funding.

a) Other sources include: (1) state match provided for grant administrative draws (in certain years from inception to current), (2) investment interest transferred from preconstruction accounts (2014 - 2019), and (c) excess funds not needed for other purposes transferred from matured bond issue accounts (2014, 2015).

(b) In 1999 and in 2001, administrative fee account funds were used to call state match bonds issued in 1989, 1990, and 1991 to provide the required state match (Other Uses). The borrowers continued to pay this portion of their loan repayment as scheduled which was then reimbursed to the administrative fee account (Other Sources). Final payment of state surcharge from the borrowers occurred in 2006.

(c) Advanced Admin Fee income totalling \$874,500 received at the closing of the issuance of refunding bonds to cover the cost of current and future administration of refunding bond issues (1996, 2001).

(d) Certain DWRF grant administrative costs incurred by the Authority are being paid from funds transferred from the WPCRF administrative fee account (2008 - current).

(e) State Match Provided/Reimbursed may be funds directly transferred to the WPCRF Program from the WPCRF administrative fee account or payments to the Authority to reimburse for funds "loaned" to the Program to provide for state match.

(f) Administrative fee account funds were used to pay bond interest (due to a shortage in investment interest income subsequent to the early termination of the associated repurchase agreement) (2012 - 2015).

(g) Other Program Grants include payments made to recipients of: (1) Planning grants (2009 - current), (2) Flood Assistance grants (2014-2015), Engineering grants (2021 -).

(h) Administrative fee income was transferred to the CWSRF Reloan account.
